

Please allow satellite radio to keep its weather and traffic channels, and expand its services. They are of great benefit to me. I don't listen to terrestrial radio anymore--the service has become so bad (weak signals, commercials crowd out public service announcements like weather reports). In fact, I do not even have a working AM-FM radio in my car any longer, so I really do need all the services that satellite provides!

I pay for these services by private contract--do not regulate my private rights as a citizen.

I therefore urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide a diverse range of programming.

Thank you!
